A VALUABLE LESSON.

An old German farmer in Ohio, who keeps a big flock of sheep, writes to his local paper and explains why he no longer votes the democratic ticket. The lesson to be learned is one that ought to be learned by every man in New Mexico, since we are all interested in the success of the woll grower, whether engaged in the wool business or any other, because wool is the paramount interest of the territory and whatever injures that comes directly home to all of us. Here is what the Olto mun says:

"I used to be a derrocrat, and I was

Pedro Perea was sireted to congress, the republican party carried New Mexico by a majorof a little over 2,000 votes and the legislature by over 5,000 majority. At that then the business interests rad undirlons of New Mexico were just bylinning to feel the effects of the prospectly which was sweeping over the land as a result of the election and inauguration of Mr. McKinley. 20 0 W Mexico had been softering for the prevnos four years from an almost total hers of her sheep and wood industry. Sheep seve only bringing from \$1.50 to till per head, wool from 6 to 8 cents pound, fulth could be bought from thee to this per head. Some things he said in his recent speech in this city give proof that this is true. For instance be declared that the fodral government feeds the Pueblo Indians. This is only a sample. During the very short time which Senor Latpagolo has spent in New Mexico, he has lived to Las Vegus, far from any of the Pueblos, and he has not learned that these Indians are industrious, self-supporting farmers and stock-

misers, who do not need nor receiv food from the government. It is always difficult for a foreigner like Senor Larragolo to familiaria himself with our country, but he ought to do so thoroughly before he can expect us to make kim our accredited epresentative in Washington.

CAMPAIGN PREDICTIONS. About this time in every campaign we begin to see wildly confident preictions on all sides. Democratic and opulist papers are now industriously estimating majorities for Bryan, and talk in the most emphatic strain. All the same, they are not known to be risking a cent's worth of anything on the turn of the event. On the other hand it is to be noticed that eastern business men are so thoroughly per-suaded of the re-election of President McKinley that they are practically discounting it and going on with their traffic on that basis. Already they are ordering immense stocks of goods on the presumption that there will be no change in the conditions,

> No man ever did more faithful service for the people of New Mexico than B. S. Rodey, when he was councilman from Bernalillo county.

The republican nominee for delegate to congress, B. S. Rodey, has all his life been a champion of labor. In the legislature he made a record by his support of every measure beneficial to ratiroad employee and miners. In no instance did he faiter in his work to secure legislation that would protect the labor Interests of this territory.

The Silver City Independent, in great big headlines, says: "Unknown Nominated by the Republicans," meaning hereby the nomination of Hon. B. S. Rodey for delegate to congress on Oc-tober 4th last. Now the question arises, who in the name of all that is good, is Larrasolo, the democratic nominee? That man certainly is not known, and certainly not favorably known, to the people of the territory. The difference between the two men is just this: Larranglo has been in this territory about three years. He is a resident of Las Vegas; is not known at all outside of the demo-pop, gang in a few counties. He has made a few speeches within the past few weeks, seeking the democracic nomination. By these speeches he has certainly not impressed himself upon the voters of the counties where ne has spoken. The bill provides that the people of New Mexico shall not be permitted to take any more water from the Rio Grande or any of its tributaries. This, as anyone can see, would meen the rum of this territory, because at least two-thirds, or probably three-fourth of the irrigated lands of New Mexico depend for their water upon the Hio Gratide or some of the tributaries of that stream.
